What is Power Distance?

The space between two poles

Relationships are a two-way street

Professor Geert Hofstede

One common indicator of power distance in a culture is language. The more power distance, the more deference is paid to authority figures through language and other behavior.

KAL Flight 801

Mitigated Speech

"Captain, the weather radar has helped us a lot."

"Do you think it rains more?"

Why they don't speak Korean in KAL cockpits.

Recognizing Gaps Tool

Recognizing Gaps Tool

Power distance gaps cause major problems. But how can you tell if there is a gap? This tool helps you recognize behavior that suggests a power distance problem.

CHECKING IN _____

Tool in Brief

- **Physical Gaps** physical avoidance behavior can suggest a gap
- **Verbal Gaps** mitigated or indirect speech may express power distance
- **Behavioral Gaps** many times actions speak louder than words – watch for gaps between what someone says and what they do

TOOL IN PRACTICE _____

Use the tool to recognize signals of power distance. When you notice one use the discussion starters to help shrink the gap.

Physical Gaps

- Physical distance, turned toward an “exit”
- Avoiding eye contact, looking at ceiling
- Closed body language (arms crossed)
- Distracted, seems lost in thought
- Holding back or agitated body language

Behavioral Gaps

- Promising one thing, doing another
- No follow through or follow up
- Passive aggressive actions
- Being “too busy” or procrastinating
- “Changing mind” about importance of issue

Verbal Gaps... These are the most recognizable signals of power distance

- Watch for mitigated speech like **hints** (“I wonder if...”); **preference** (“perhaps we should...”); **question** (“do you think ___ would work?”); or **team suggestion** (“why don’t we try ___?”)
- Look for attempts to “sugarcoat” or downplay bad news
- Being overly polite or deferential
- Quickly deferring, backing down when rejected by someone in power

Discussion Starters... Once you notice a gap, try this to close it

- “You seem uncomfortable. It’s OK – I really want to know what you think.”
- “I’m not 100% sure what I think about this myself. Tell me what you really think.”
- “OK, that’s what I do [name behavior] when I’m not sure if I should say something. What’s up?”
- “I need your help. Can you be honest and tell me exactly what you think about this?”
- “I may be completely off base here, I don’t know. Can you tell me what you really think?”

Physical Gaps

Look For...

- Physical distance
- Turn toward an “exit”
- Avoiding eye contact, looking at ceiling or floor
- Closed body language (arms crossed)
- Distracted, seems lost in thought
- Holding back or agitated body language

“Tune” Your Radar

Verbal Gaps

Look For...

- Hints: “I wonder if...”
- Preference: “maybe we should...”
- Question: “do you think ___ would work?”
- Team suggestion: “why don’t we try ___?”
- Attempts to “sugarcoat” or downplay bad news
- Overly polite or deferential
- Quickly deferring or backing down when rejected by someone in power

Recognizing Gaps Tool

Power distance gaps cause major problems. But how can you tell if there is a gap? This tool helps you recognize behavior that suggests a power distance problem.

CHECKING IN _____
